

Harmonization of product energy efficiency standards and free trade agreements: The role of international cooperation

Eceee Summer Study 2017

30th May, 2017 – Presqu'île de Giens, France

Jurei Yada, IPEEC Secretariat

International Partnership for Energy Efficiency Cooperation (IPEEC)

Outline of main points

- 1) FTAs as an area for action by energy efficiency policymakers
- 2) Increased inter-policy sphere dialogue and cooperation key
- 3) International collaboration platforms as mechanisms to pursue dialogue at governance level

FTAs and product MEPS harmonization

- FTAs as tool to drive harmonization of product energy efficiency standards
- Impact on energy efficiency policies
- Potential for action by energy efficiency policymakers

Role of international cooperation and dialogue

- Bridging the inter-policy sphere expertise gap
- Information exchange, greater policy coordination
- Indirect influence on FTA outcomes

International collaboration platforms

- Mechanisms for dialogue at governance level
- Expert international collaboration platforms:
e.g. IPEEC, IEA, UN Environment
- Possible ways forward:
 - Working groups
 - Institutional rapprochement with WTO
 - Institutional space of FTAs, e.g. CETA Regulatory Cooperation Forum
