Planning voluntary agreement scheme for Ukraine

Tamara Burenko
SAEE, Ukraine
1. ISO 50001 Certificate  
2. Energy audit data on energy consumption and a list of energy efficiency measures to be undertaken  
3. Payback period of measures and the volume of fuel consumption reduction

1. Equipment (motors, boilers, cogeneration units)  
2. Engineering systems (lighting, ventilation, heating, steam cleaning)  
3. Metering systems (for energy, resources)  
4. Use of RES and alternative fuels  
5. Thermal modernization of buildings (with a class of energy efficiency not lower than C)

1. Introduction of all energy efficiency measures  
2. Reporting on fuel consumption reduction  
3. Reporting on fuel consumption for the next 3 years

40% of the loan amount  
- but not more than 3 million UAH for companies with annual energy consumption of up to 700 toe  
- not more than 5 million UAH for companies with annual energy consumption of more than 700 toe
Action plan for 2018

**Drafting of concepts of secondary legislation** regarding usage of funding from state budget for energy efficiency modernization of industrial companies:

1. Rules and procedures for usage if funding;
2. Full set of regulations for implementation of VA scheme (defining additional functions of SAEE, procedures for verification and monitoring, etc.)

**Conducting a pilot implementation** of the VA scheme at one of the companies (with project UNIDO and DEA)

*June 2018: discuss and approve ToR; getting started*
Thank you for attention!
