

PANEL 3

LOCAL ACTION

**Wake up!
Two-thirds of
global energy
consumption
occurs in
buildings in
cities**

**Chinese cities
have
considerable
room for
improvement in
green and low-
carbon
performance**

**City planning in
response to
extreme weather
is an opportunity
for resilience
PLUS efficiency**

**The functional
sphere of the
local economy
frames EdF's
support for
intermediaries
and capacity-
building**

**Public-
private
partnership
can still work
even when
national
policy fails**

**GIS-energy
modelling at
dwelling and
district scale ...
zooming in and
zooming out**

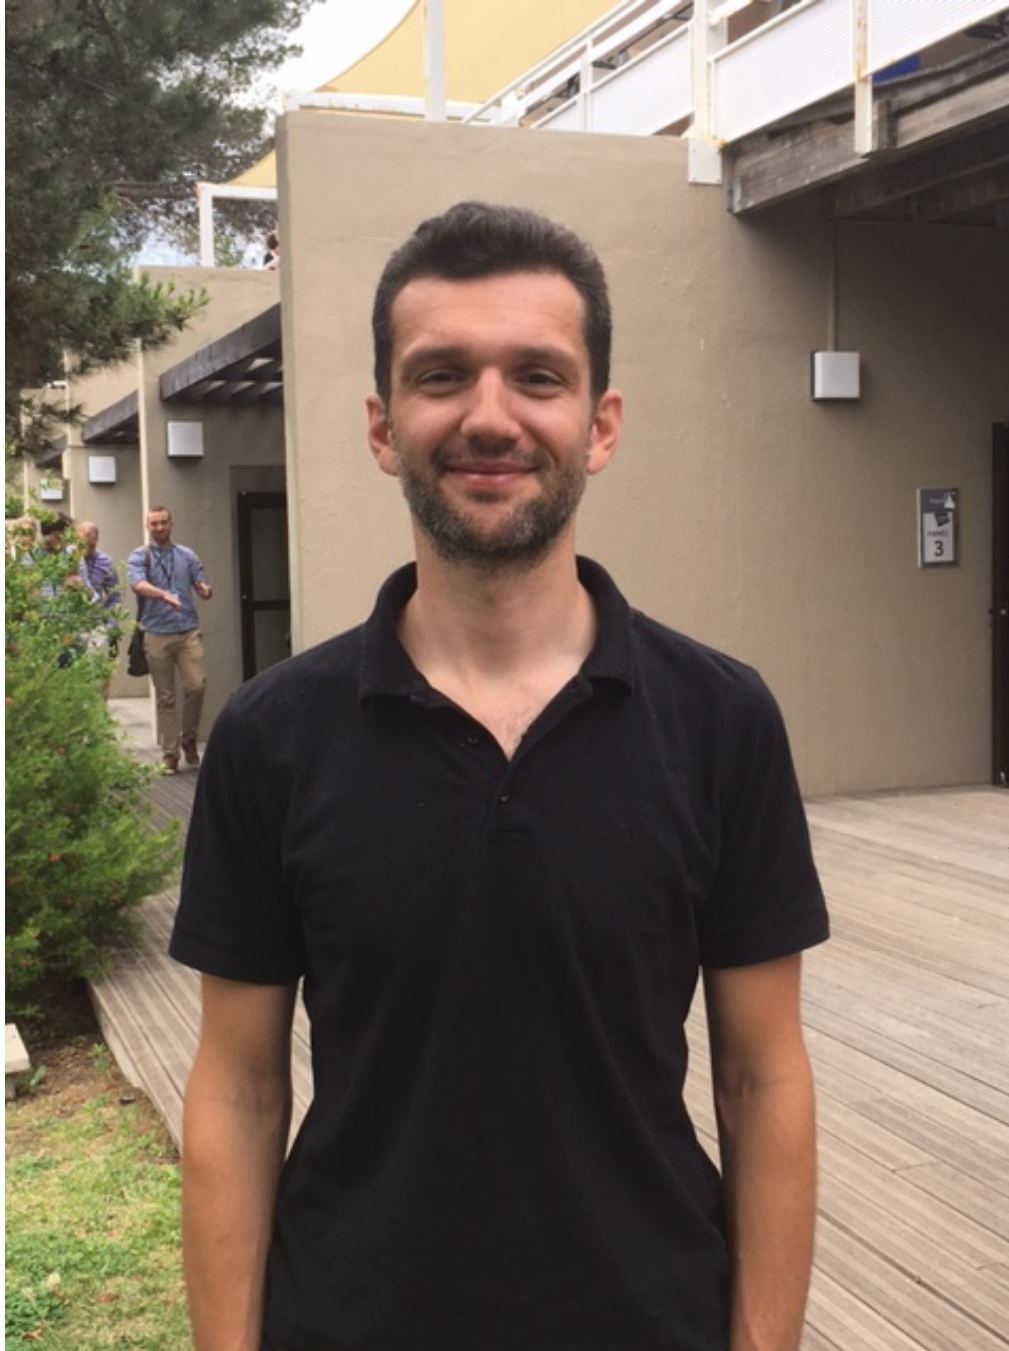

Europe has 450 regional energy agencies ... where are they all?? Sweden wants to share experiences

**Intermediaries
on pioneering
energy projects
in the UK have
evolved over
the last 20
years**

Community-level innovators and expert agencies can work together ... but not if the funding gets cut!

**Future
decentralisation
of the energy
system in
France means
we need new
governance
structures**

**Smart-meter
roll-out needs
support
systems, cost
recovery and
skills if it is to
work well**

**Woody forest
waste is a
neglected
resource for
biomass energy**

**Collaboration
helps overcome
the fragmented
delivery of
housing
renovation, and
takes many
forms**

Geneva has taken the time to learn lessons from elsewhere before acting on retrofit of multi-family housing

**Do communities
and landlords
want energy
advice? Not
really ... not even
for free!**

**Advice is the
invisible glue
that holds the
rest of retrofit
policy together**

50,000 small firms delivering renovation in the UK ... they influence the market more than we can

**Bonds, loans,
ESCOs,
performance
contracts ... and
let there be light!
(Energy efficient,
of course ...)**

**Peer-to-peer
mentoring
needs to be
interactive,
structured and
tailored to the
individual**

2/3 of signatories to the Covenant of Mayors are from small towns and need support from a higher level

SEE YOU
NEXT
TIME!
