SEFFICIENT? SUFFICIENT?

eceee 2019 Summer Study on energy efficiency 3 – 8 June • Presqu'île de Giens, France

Europe's most important energy efficiency event

The atmosphere is truly energised: nine panels with over 200 presentations based on peer-reviewed papers or extended abstracts, 50 informal sessions, solutions workshops, evening plenaries and much more! See theme and panels pages on our web site for more information.

Held for the first time in 1993, the Summer Study now gathers 400 energy efficiency professionals for five full days. The setting is informal and the vision is shared: to explore and expand the evidence and intricacies of energy efficiency to increase our understanding and knowledge base.

Your company can benefit by being part of this process

eceee, with its established track record of credible and evidence-based information now invites your organisation to become a partner in this exciting venture.

By becoming a partner, your company is associated with the state-of-theart knowledge in energy efficiency that is such an integral part of the Summer Study. This not only refers to technical solutions, but as much to policy, programmes, financing mechanisms and user behaviour.

eceee offers you visibility in a context where unbiased quality and credibility is a key feature.

of the best energyefficiency events I ever attended.

Energy efficiency first, but what next?

The 2018 IPCC report has given the Paris agreement and new sense of urgency. We are not on track to meet Paris agreement goal of keeping the increase in global average temperature to well below 2°C above pre-industrial levels. And we are even further away from the aim to limit the increase to 1.5°C. At the same time, the IEA has shown that energy efficiency improvements are slowing down at a time when we need to do much more.

But efficiency alone is not enough; we also need to look beyond efficiency improvements towards how we can reduce absolute energy consumption.

Moving the frontiers

What do we need to break the curves of increasing energy demand and rising temperatures? The eceee Summer Study moves the frontiers of energy policy and established practices. These are five days that shape tomorrow's European energy efficiency policy.

With friendly participants who feel very enthusiastic about the work that they do."

The advantage of being a partner

All partners will enjoy the benefits of visibility on the **eceee** web site, conference materials, and conference displays.

The **eceee** proceedings is a highly appreciated online resource that lasts for years after the Summer Study ends. The **eceee** web site is generally regarded as one of best resources for information on energy efficiency in Europe and globally.

Participating in the Summer Study is also great for networking, regardless if you are looking for clients, need to discuss a project, or are about to recruit qualified staff in a sector where the demand for competent experts is greater than the supply. For more information on the event, see:

http://www.eceee.org/summerstudy

Join us as a partner

For more information, contact Nils Borg, Executive Director, at nils@eceee.org

The summer study is a valuable meeting place between researchers, national policy makers, the EU commission, and representatives from consulting companies and industry.

Partners benefits overview Gold, Silver and Bronze Partners can also select options from the custom packages offered in those categories. These are outlined below. eceee is happy to assist in developing a package that suits the needs of each partner. Combinations of different packages are an option.	Gold Partner min €25,000	Silver Partner €15,000	Bronze Partner €10,000	Contributor €6,000
Free conference registrations, numbers of people 1	5	3	2	1
Logo and link on eceee Summer Study web site	х	х	Х	х
Logo on proceedings web site for approximately 1 year	х	х	Х	х
Logo in promotional e-mails	х	х	Х	х
Logo displayed at conference venue	х	х	Х	х
Small display at conference (3 sqm, poster or pop-up screen)				х
Medium display at conference (appr 6 sqm)			Х	
Large display at conference (appr 9 sqm)		Х		
Extra large, prominent display at conference (above 10 sqm)	х			
Custom partner package (see below)	х	х	х	
Include information material in attendees package	Х	Х		

¹⁾ The conference fee does not include accommodation, which has to be paid separately.

Custom package Gold Partners (either of the below)

Gold Partners are offered great flexibility in combining the options from the custom partner package described below.

Host a plenary session

As a Gold Partner you are seen as a true leader in energy efficiency, and you are invited to host a plenary session and deliver a keynote address.

Host social event

Your organisation hosts the social event in a pleasant and informal atmosphere. You have the opportunity to deliver a gift or information to the participants.

Set up Exclusive Side Event

At the Summer Study, you are invited to set up an Exclusive Side Event.

Custom package Silver Partners (either of the below)

Host cocktail reception on first day

After the opening plenary, all participants are invited to a cocktail reception to start the networking and get to know each other.

Host Solutions Workshop

At the Summer Study, you are invited to set up a Solutions Workshop where you develop the agenda together with eceee's energy efficiency experts.

Host poster session

The poster session is a highly informal event where many participants present their posters describing their projects. During the event drinks and snacks are served and participants mingle and discuss in a relaxed atmosphere for about two hours.

Custom package Bronze Partners (either of the below)

Host Solutions Workshop jointly with other partners

Bronze partners are invited to host Solutions Workshops with other partners. The content of these workshops are developed together with eceee's energy efficiency experts.

For more information

Contact Nils Borg, eceee's Executive Director, at nils@eceee.org

Events with contents developed by you

Exclusive Side Event

eceee offers partners to set up an Exclusive Side Event. This event is organised in an informal fashion but planned in the programme and announced in advance.

Only one Exclusive Side Event will be held, and this is offered to a Gold Partner or to a Silver Partner teaming up with another Silver or Bronze Partner.

Solutions Workshops

The Solutions Workshops are also organised in an informal fashion, planned in the programme and announced in advance. Unlike the side event, they are held in parallel with informal sessions.

You develop the workshop together with **eceee's** energy efficiency experts.

- 97 % said they made new contacts, which will be useful in their professional life.
- 96 % said they learned something new, which will be useful in their work.
- 76 % said they made new contacts, which they believe will result in new international collaboration.

2017 Summer Study evalutaion

Five days at the Summer Study

Five intense days

The eceee Summer Study offers five intense days of formal paper presentations, informal sessions, solutions workshops and plenary talks. Day and night, you will find hundreds of people eager to discuss energy efficiency.

Mornings – panel sessions: From

Tuesday to Friday, between breakfast and lunch, the nine panels run in parallel for the presentation and discussion of peer-reviewed papers and abstracts.

Afternoons – a less formal approach:

The period after lunch each day is reserved for informal sessions in which any participant can set up a discussion on a current energy efficiency issue. Solutions workshops run in parallel.

Display session: The poster session is held during one afternoon.

Evenings – plenary sessions:

Plenary sessions are held in the early evenings. High-profile speakers from around the world are invited as plenary speakers.

Beyond a traditional conference

The eceee Summer Study is not your standard energy efficiency conference. It offers a mix of practical hands-on experience and scientific stringency in a setting ideally suited for networking and information exchange.

Over the years, **eceee** has developed a conference format where presentations based on peer-reviewed papers and abstracts in parallel panels are mixed with workshops and informal sessions to stimulate networking and experience sharing.

One of **eceee's** aims is to keep building on the basis of evidence-based knowledge, analysis and information, while helping to develop a community of energy efficiency experts. We expect about 400 participants, but the community being built around the conference extends beyond the participants.

The Summer Study lasts for five days and eceee offers the conference as a *five-day, full-board package*. The majority of participants stay throughout the week on site at the beautiful Belambra Les Criques near Toulon/Hyères in the south of France, which has been rented exclusively by eceee for the week. Everyone you meet on site will be passionate about energy efficiency and discussions take place around the clock.

Unlike most conferences, there is a strong sense of community at the Summer Study and a commitment to shared goals.

This creates an openness to new ideas and to new people that I found welcoming, and highly rewarding.77

An excellent training event

Many companies and public institutions send staff to the Summer Study for a week of intense training in energy efficiency. Here, your staff can meet experts with up-to-date real knowledge of energy efficiency, both in terms of technology and policy.

The week will help participants to better understand what works and what doesn't.

Through the Summer Study, **eceee** offers training at a considerably lower cost than traditional training courses.

We will be happy to provide a detailed offer describing the training specifics of the conference. The Summer Study is immensely valuable since it allows time to digest and discuss ideas.77

About eceee

eceee, the European Council for an Energy Efficient Economy, is the largest non-profit, membership-based energy efficiency NGO in Europe. The goal of eceee is to promote energy efficiency through co-operation and information exchange.

To facilitate this, **eceee** provides evidence-based knowledge, analysis and information. **eceee** provides an information service through its web site and news service, arranges conferences and workshops and takes active part in the European energy efficiency policy discussions.

One of **eceee's** principal events is the five-day Summer Study held in June every odd year. Since 2012, **eceee** sets up an industrial energy efficiency event in even years.

For more information, visit our website – www.eceee.org

For more information on joining as a partner, contact **Nils Borg**, Executive Director, at **nils@eceee.org**

What a terrific event!
The Summer Study was informative, thought provoking, friendly and inspiring. Well done!
